SLAB & PAVER ICON LEGEND

Pedestrian Traffic

Suitable for pedestrian use only, such as walkways and patios.

Vehicular Traffic

Suitable for residential vehicle use such as driveways, as well as walkways and patios.

Solar Reflectance Index

High solar reflectance keeps pavement area cooler. A higher number indicates greater reflectance.

Permeable

Designed to allow increased drainage between paver joints and into the ground.

TECHNOLOGY ICON LEGEND

EliteFinish™

Product produced with enhanced finish technology. See page 4 for more information.

ColorBold™

Product produced with enhanced colour technology. See page 4 for more information.

MANUFACTURING EXCELLENCE

Our focus.

At Oaks Landscape Products, we challenge ourselves to see things through our customers' eyes. We focus on processes that make a positive impact from production, right through to the end-user. We aim to simplify. Through talking less and listening more, valuable customer feedback forms the basis of our product development, and guides us every step of the way.

Your trust keeps us focused on our goal, and motivates us to strive to do more, to do better, to evolve along with the needs of our clients and industry trends. From our state-of-the-art production facilities to quality control, distribution and customer service, we ensure our products are made to last.

STRENGTH & INTEGRITY

Our guarantee.

Oaks Landscape Products are manufactured to the highest quality standards in a tightly controlled, fully monitored production environment. Oaks Landscape Products warrants the original property owner that the concrete product is free from material defects. Material found to be defective will be replaced without cost. Colour matching cannot be guaranteed and replacement labour is not included. This assurance of quality is applicable where concrete products produced by Oaks Landscape Products are installed on the site and is subject to use under normal conditions.

Some Conditions apply.
Scan to view limitations & exclusions.

OUR MANUFACTURING Technologies

ELITEFINISH™

EliteFinish™ is an advanced manufacturing process that delivers richer, more vibrant colour and a harder wearing, more durable and smoother textured surface.

The surface of our EliteFinish™ products is a specially engineered layer of finely-ground, durable aggregates combined with rich colour and concentrated cement.

The paver foundation uses coarser stone to ensure long term performance in application. The resulting product delivers an enhanced finish and greater structural integrity.

PRODUCTS WITH ELITEFINISH™

- BONAIRE **NEW!**
- ETERNA
- MARKET PAVER 60MM
- MARKET PAVER 80MM
- MOLINA® 60MM
- MOLINA® 80MM
- MONTEBELLO **NEW!**
- STRASSA
- YORKVILLE SLAB **NEW!**

COLORBOLD™

ColorBold™ is an integral treatment employed during manufacturing that provides a new level of colour longevity and stain resistance. ColorBold™ is a proprietary process where supplemental ingredients penetrate the surface of the product to become an integral part of the unit. Enhanced colour depth, extended colour durability, improved resistance to stains and acidic materials, as well as improved freeze-thaw capability due to decreased moisture absorption are all benefits delivered with products featuring ColorBold™.

Other colour enhancement products are sealers applied post production, after the concrete has been thoroughly cured; the chemical can only penetrate whatever surface voids are present, with the balance being left as a film on the paver surface.

OUR COLLECTIONS &

Our 5 Axes of Design

Learn more about our Collections!
[Scan Here](#)

Simplify the selection process with our carefully curated masonry and landscape collections. Choose products with similar characteristics to maintain a unified look across your entire project, or mix and match by combining products across different collections to showcase your unique style!

All of our well-integrated product collections are built around different sets of design characteristics, yet revolve around five common axes.

1

SIMPLICITY

Our product design process begins with simplicity; A well-conceived lack of complexity that makes our masonry and landscape collections easier to design, quote, and install your most beautiful project vision every time.

2

MODULARITY

The sizes and scale of our products were developed for mixing and matching different products within each collection for a completely coordinated look. Each individually distinct unit in our product lines aids in building a continuous function.

3

CONTINUITY

Every successful home plan pivots around continuity. The unity between form and function, front and back yards, between horizontal and vertical surfaces, and even from masonry to landscape is what truly pulls an outdoor design theme together.

4

UNITY

Our masonry and landscape products are designed for use together in unison. The continuity, affinity of colours, textures, surface finishes, product sizes and scale within our product collections allow various options for combining all these parts into a unified vision where all the elements of your outdoor design fit together.

5

ARTISTRY

Our fifth axis of design is about you. The preceding four axes provide all the ingredients for enhancing your creativity in any project: versatility in product size, shape, scale, and colour for an optimum product offering. The true artistry is in selecting and utilizing products from our various collections to express your creativity.

1 ONE SAND

The only polymeric sand you need.

Absolute Black

Canvas Beige

Granite Grey

Fast, easy setting 1ONEsand polymeric sand is a specially formulated, high-performance mix of calibrated sands, polymers, and binding agents designed to fill and firmly bind paver joints up to 4" (100mm) wide. 1ONEsand remains stable and just flexible enough, maintaining its durability and flexibility in the most extreme weather conditions.

Available in 3 colours!
50lb (22.7kg) bag, 63 bags/skid

FREESTANDING & RETAINING WALL

Capabilities Chart

This chart provides general construction limits based on a typical planter bed behind the wall. Reference the available Estimating Guides (Nueva®, Ortana and Proterra™) for higher retaining walls, where there is any sort of load (slope, fence, traffic) behind the wall, or where any other special conditions exist. Design support is recommended when there is a pedestrian guard required [area behind the wall is accessible and the wall height exceeds 600mm (23.6")] and/or a building permit is required [wall height exceeds 1,000mm (39.4")].

PRODUCT	DESIGN	MAXIMUM WALL HEIGHT UNDER IDEAL CONDITIONS		ADHESIVES REQUIRED	SETBACK ANGLE	MINIMUM OUTSIDE RADIUS	
Gardenia Linear	Setback	24"	600mm	NO	5°	-	-
Laredo	Vertical	19.1"	485mm	YES	0°	-	-
Modan	Vertical	21.7"	550mm	YES	0°	-	-
Modeco One	Vertical	17.5"	445mm	YES	0°	30.25"	768mm
Nueva® 75 Wall	Vertical	20.7"	525mm	NO	0°	-	-
	Setback	20.7"	525mm	NO	3.5°	-	-
Nueva® 150 Wall	Vertical	20.7"	525mm	NO	0°	-	-
	Setback	20.7"	525mm	NO	3.5°	-	-
Ortana	Vertical	20.7"	525mm	NO	0°	48"	1219mm
	Setback	26.6"	675mm	NO	7°	48"	1219mm
Proterra™	Vertical	21.9"	555mm	NO	0°	-	-
	Setback	36.4"	925mm	NO	8°	-	-

Note 1: Maximum height includes the buried portion of the wall and the coping unit (where applicable).

Note 2: Concrete adhesive is required for products with no form of interlock between units.

STEP-BY-STEP GARDEN WALL

Installation Guide

Choosing a Contractor

You are about to invest in a long-lasting concrete landscape project. Like any construction project, the quality of the final result is highly dependent on the quality of the contractor doing the work.

Recommended Contractor Qualifications:

- Member of Concrete Masonry and Hardscape Association (CMHA)
- CMHA certified hardscape installer or certificate holder
- Project references (recommend installation experience of a minimum of 10,000 sq.ft.)
- 2-year installation warranty
- Verify insurance and applicable licenses
- Adhere to the installation guidelines recommended by CMHA

To find a certified installer visit
www.masonryandhardscapes.org
