World Leading Technology...

Intricate detail of the products – the strength and thickness of the steel, the perfect weight & balance, the positioning of the handles – guaranteed better than the rest!

Packed with innovation, OX tools raise the benchmark for tool performance to unprecedented new levels.

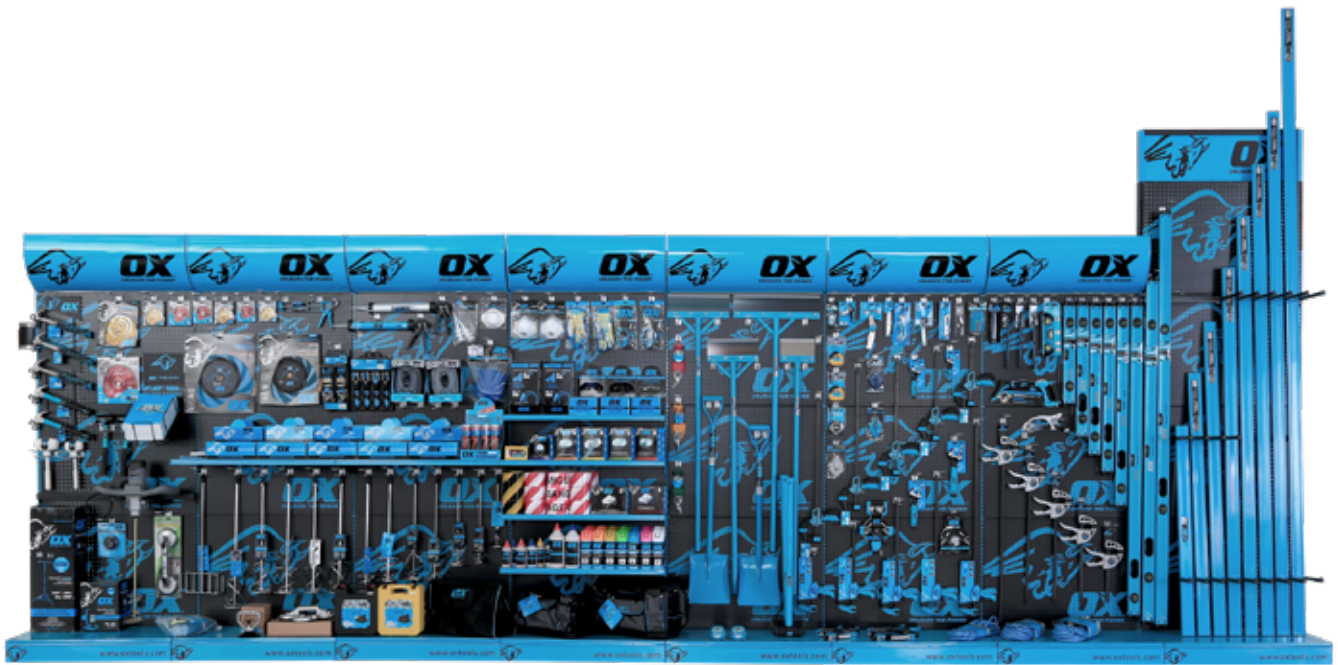

The materials and construction are of the highest quality to stand up to an unbelievable amount of force.

Only heavy use can really demonstrate the power and resistance of these tools.

LEARN FROM THE BEST, TRAIN WITH THE BEST

New innovative tool development

With our 46 years experience, and product and marketing innovation, we deliver ingenious design solutions to meet ever-evolving customer requirements.

The performance, service life and ergonomics of our tools are guided by the need to meet the high expectations of professional users on the jobsite.

Green Focus

Responsible Packaging Solution

At OX Tools, we believe we have a responsibility to do our bit. That's why we choose to use Eco-Friendly packaging.

We are focused on using packaging supplies that are safe for the environment. As we continue to evolve our green focus for a better environment, we will ensure that we adapt new eco-friendly packaging solutions.

OX Tools is committed to:

- Comply with all relevant environmental legislation, regulations, planning policies and related initiatives.
- Set environmental objectives and targets to ensure continuous improvement.
- Measure, monitor and report on environmental management initiatives.
- Incorporate environmental better practice into our core business plans and management process.
- Undertake responsible resource management practices that aim to prevent pollution and reduce waste.
- Ensure we work closely with our clients, suppliers and other stakeholders to continually improve our business processes which affect the environment.
- Explore best practice and innovative environmental management approaches to the use of education, technology and infrastructure.
- Foster the initiation and ownership of environmental activities by all our staff through education, thereby building a strong environmentally aware business culture.

E-Tape Plus

Measuring Tools

Few tools are as widely used across the world as the tape measure.

We at OX recognise that and build our tapes to last the test of time. Durability, reliability and innovation are the words we think of when designing a new line of tapes.

OX has enhanced it's reputation as a leading tape manufacturer with the launch of the new Pro Series short tape, which boasts an impressive 3.0m stand out whilst remaining an extremely compact design.

PRO STAINLESS STEEL TAPE MEASURE

FEATURES

- Professional tape measure
- Stainless steel case with over mold for heavy duty use
- Extra tough nylon coated steel 30mm wide blade
- 3.0m stand out
- Large end hook
- Easy access thumb lock

Product code	Barcode	Size	Order Qty	Box Qty
OX-P029308	9341231015519	8m	1	6

PRO TAPE MEASURE

FEATURES

- Chrome case with over mold for heavy duty use
- Cushion grip for comfort and slip resistant hold
- Extra tough nylon coated steel 27mm wide blade
- 2.8m stand out
- Bigger end hook
- Easy access thumb lock
- Class II & CE approved

Product code	Barcode	Size	Order Qty	Box Qty
OX-P020908	5060242331633	8m / 26ft	1	6

PRO TAPE MEASURE

FEATURES

- Extra tough nylon coated 32mm wide blade
- Blade available in metric / imperial & metric only
- 2.8m stand out
- Class II & CE approved
- Heavy duty construction
- Easy slide thumb lock

Product code	Barcode	Size	Order Qty	Box Qty
OX-P028708	5060359918765	8m / 26ft	1	6

Measuring Tools

TRADE TAPE MEASURE

FEATURES

- Duragrip moulded rubber case
- Nylon coated steel blade
- Easy access sliding thumb lock
- Shock absorbing blade return bumper
- Quick release bottom strip
- 25mm wide blade

OX-P503412	9341231038907	48" / 1200mm	20	20

Checking the accuracy of a level

Checking the accuracy of a level is easy. When you are purchasing a level or think that your level may have been damaged on the worksite, you can check its integrity with the following simple steps.

To check the horizontal vial:

1. Place the level on a flat surface.
2. Make two marks:
 - At the end of the level – **End Mark**.
 - Along the body of the level in line with the horizontal vial - **Test Point**.
3. Read the vial and remember the bubble's position.
4. Turn the level around 180° from end to end and set side of the level back on the test surface. Be sure to line up the vial with the **Test Point**.
5. Take your second reading.

NOTE: The bubble in an accurate level will give you the same reading both times. Any difference in the bubble's position is the degree of inaccuracy in the level.

6. Repeat the test even if the readings indicated an accurate level.

To check the vertical vial:

1. Place the level against a plumb doorframe or flat wall.
2. Make two marks:
 - At the end of the level – **End Mark**.
 - Along the body of the level in line with the vertical vial – **Test Point**.
3. Read the vial and remember the bubble's position.
4. Turn the level from side to side (not end to end) and place it back on the wall. Be sure to line up the vial with your **Test Point**.
5. Take your second reading.

NOTE: The bubble in an accurate level will give you the same reading both times. Any difference in the bubble's position is the degree of inaccuracy in the level.

6. Repeat the test even if the readings indicated an accurate level.

End Mark

Test Point

Turn the level 180° side to side

Align the vial with End Mark and Test Point

Concreting Tools

Concreting is hard work and the OX range has been developed to stand the test of time.

Look at the detail of the products – the quality and thickness of the steel, the perfect amount of flexibility, the positioning of the handles, the quality of the riveting – the complete finish.

A tough range of trowels to cement your reputation.

Bricklaying Tools

Bricklaying is a highly skilled trade and is characterised by regional variations in both brick size/shape & laying techniques.

We have spent 46 years 'Living the trade' with bricklayers & liaising with training institutions around the world to ensure our products are second to none.

From the strength of the forged steel to the perfect weight & balance – these tools symbolise quality. Guaranteed better than the rest!

Plastering & Drywall Tools

No trades are as demanding on the design of its tools as the plastering & rendering trade.

Many tools look the same, but the OX Range has been tried and tested by tradesmen and offers unmatched quality.

OX tools do what you want them to do, over and over again.

A tough, durable design for the professional plasterer – you'll probably wear out before they do!

Demolition Tools

The OX demolition range is a very impressive line up.

The handles are shaped and sized to provide comfort in the hand with shock absorbing technology.

The materials and construction are of the highest quality to stand up to an unbelievable amount of force. Only heavy use can really demonstrate the power and resistance of these tools.

Safety / PPE

If you are looking for hard wearing, functional Personal Protection Equipment to cope with the most extreme work conditions – OX has what you need.

Like you, we take our work seriously and believe that every detail has to be designed and manufactured with great care to ensure our products really work and also look good.

By controlling the entire chain, from design to production to the central warehouse, we can be sure that our products are of unmatched quality and consistency.

All OX safety products meet 'EN or CE standards' where applicable.

OX is known for a 'whatever it takes attitude'. Our products pass extensive network of quality checks. If we have failed somewhere in the chain, we will correct it. To us a failed product is the same as a broken trust.

Once you have tried OX Safety you will never leave it!

Diamond Tools

OX has been innovating diamond tools for over 46 years and is now clearly recognized as one of the leading brands of choice and at the forefront of technology.

With our 46 years of experience as well as our product and market innovation, we deliver design solutions to meet ever-evolving customer requirements.

Our award winning diamond tools are produced in some of the world's most technically advanced laboratories and factories, guaranteeing the highest manufacturing quality.

Product guarantees & safety

The concept of safety is fundamental to the philosophy of the OX range. It is interwoven into the very fiber of innovation, design and production from concept to after sales service.

EN13236
Blades conform to USA, European and Australian standards.

Full 'No Hassle' Guarantee
All OX products are backed by our full 'No hassle' guarantee – Ensuring confidence of distributors and their customers.

Diamond Innovation
Ongoing development provides increased performance on existing products and innovative new diamond solutions.

Safety
Products undergo rigorous safety and vibration testing at our research & development facility, and in the field.

Professional Builders Award
Professional builders coveted 'Top Product' Award was won by the OX-PU10 PROFESSIONAL diamond blade in 2006.

Ultimate Guarantee
Ultimate products undergo extreme testing – the OX-PU10 undergoes factory testing +80% more demanding than the requirements of EN13236.

Hand/Arm Vibration
OX products were among the first to be tested and certified safe for hand/arm vibration.

Extra Safe
Our safety policy is an integral part of our company ethos with policies incorporating ISO18001.

Staff
Staff safety and care is no afterthought. Our personal and individual approach is reflected in our attitude to customers and staff alike.

Environmental
Showing that we care: Manufacturing operations accredited to ISO 14001 environmental systems.

We have a responsibility. Quality control systems and environmental and safety management ensure that our care covers not only our products and our customers – but that our ethical guidelines address issues such as staff safety and care for the environment.

RECOMMENDATION GUIDE

World leading technology...

Only the finest quality of diamond is used in the production of OX products

State of the art laser technology for ultimate performance and safety

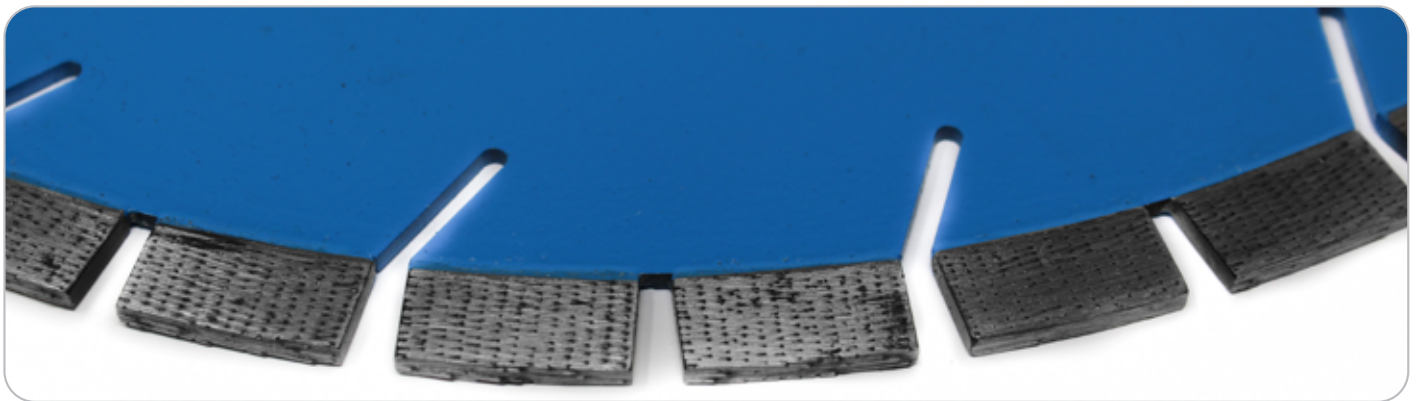

Blade cores are made of the highest quality steel, precision engineered, ground and hardened

What is 'wave' technology?

OX Tools developed the UU10 ULTIMATE UNIVERSAL DIAMOND BLADE with WAVE Technology to tackle the toughest materials on the jobsite. We LIVE THE TRADE and work closely with contractors to prove our technology.

We are committed to increasing productivity which in turns makes you more money. The WAVE technology increases the speed of cut, increases the life of the blade, reduces vibration and makes the cutting experience better!

The ultimate performance product. When only the best will do; ultimate says it all.

BLADE PROFILE: UU10

ULTIMATE SERIES

When we set out to create the ultimate range, the brief was that these blades needed to be better than anything else available on the market for performance, presentation and value. We believe we have excelled ourselves.

The Ultimate range stands apart from the crowd. It is a range of its own and has its own packaging, brochure and stands. Backed by every safety standard including EN13236. Guaranteed safe. Guaranteed to perform.

ULTIMATE UA10 BLACK SHARK ASPHALT

Asphalt blade with 10mm segment height. Featuring 'wedge segment' undercut protection, 'U' clearance gullet. Applications include: asphalt & extremely abrasive products, cement screed, lignacite blocks.

Product code	Barcode	Diameter (in)	Bore (in)
OX-UA10-14	9341231002977	14	1" - 20mm

INTRODUCING... OXTREME DIAMOND BLADE

BUILT FOR SPEED. CUTS ALL... GUARANTEED!

ULTIMATE RENTAL BLADE

ULTIMATE RENTAL BLADE

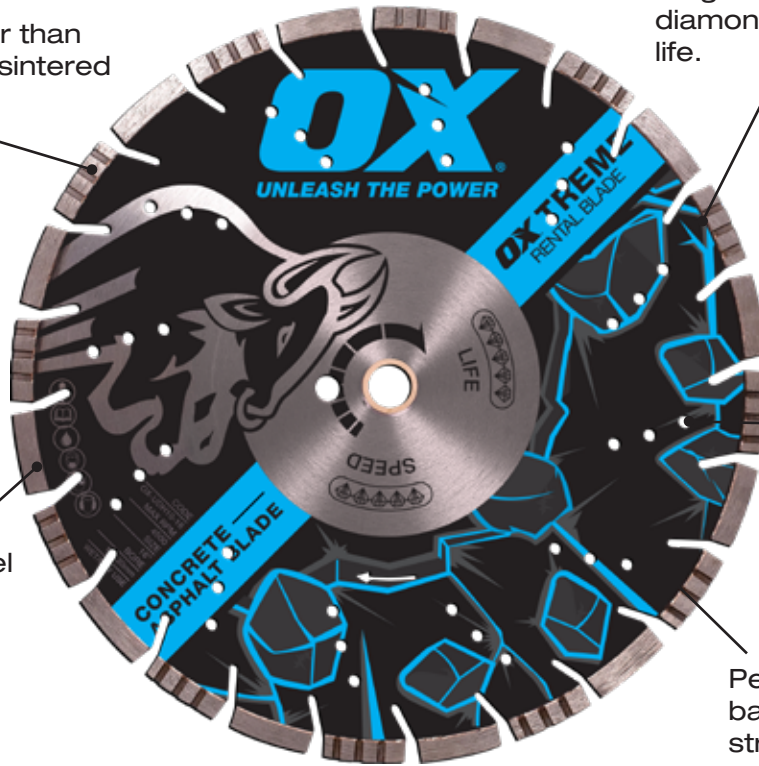

100x stronger than hot pressed sintered blades

Ultra-hard cutting segments made from a blend of tungsten and diamonds for longer life.

Balanced steel core design

Cooling holes to avoid overheating

Perfectly balanced for a straight, true and clean cut.

ULTIMATE OXTREME RENTAL BLADE

Engineered to cut quickly through a variety of materials including asphalt, concrete and reinforced concrete. Ultra-hard cutting segments made from a blend of tungsten and diamonds for longer life. Engineered with Grade A synthetic diamonds for a smoother faster cut.

ULTIMATE CONCRETE/ASPHALT DIAMOND BLADE

The OX Ultimate Series UB12 Diamond Blade is guaranteed to cut quickly through a variety of materials. Designed for safety, while providing smoother quieter cuts, the steel reinforced center plate reduces vibration, warping, wobbling and increases user comfort. The performance output of the blades is what you would associate with a ultimate product at a price that has revolutionized the market. Applications include: concrete, flint & limestone aggregate, reinforced concrete.

Product code	Barcode	Diameter (in)	Bore (in)
OX-UB12-12	9341231050138	12	1"-20mm
OX-UB12-14	9341231050145	14	1"-20mm

ULTIMATE UBF DUAL PURPOSE

Very high quality long life blade with 3/8" / 10mm segment height, featuring 'wedge segment' undercut protection. Applications include: concrete, flint & limestone aggregate, reinforced concrete.

Product code	Barcode	Diameter (in)	Bore (in)
OX-UBF-18	9341231003875	18	1"

ULTIMATE MULTI-PURPOSE CARBIDE BLADE

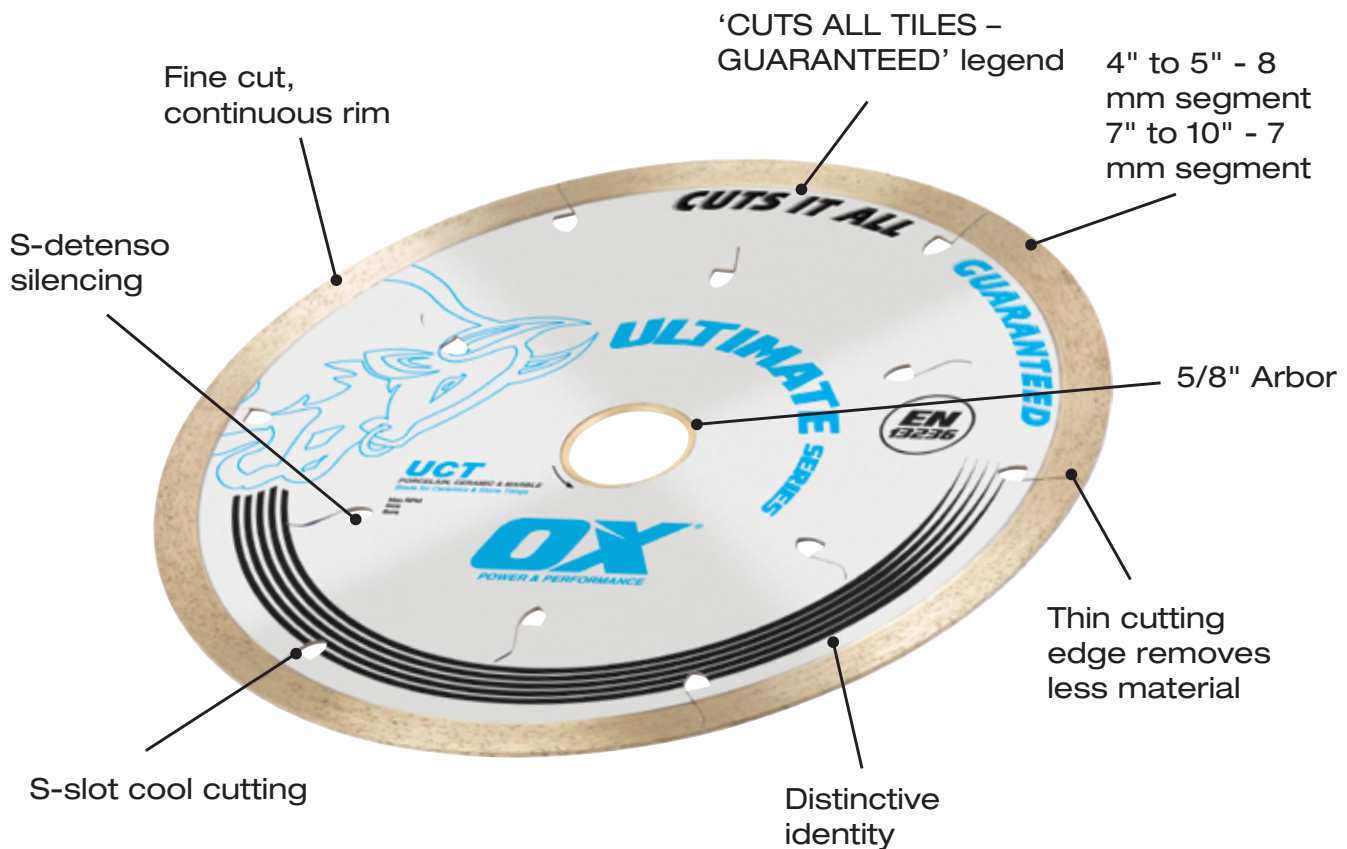

The OX Ultimate KARBITE is a multi-purpose saw blade made up of carbide clusters welded to a reduced noise and vibration center plate which can cut equally well in either direction and can rip through many products which cannot be cut using a diamond blade or chainsaw. The KARBITE does not need to be sharpened – simply turn it round and carry on cutting. Can be used with gas cut-off saws and angle grinders. Applications include: multi-purpose - wood, metal, rubber, plastic, abrasive blocks

Product code	Barcode	Diameter (in)	Bore (in)
OX-UKB-4.5	9341231005138	4.5	7/8" - 5/8"
OX-UKB-14	9341231020384	14	1"-20mm

Tiling is a big thing in today's world, and the last few years have seen a massive increase in the use of natural stone and man-made ceramics in commercial and domestic situations. For cutting ceramics, a smooth continuous rim diamond blade is used to give a fine clean cut – where a segmented blade could cause chipping. Our ceramic tile cutting blades are available in the PRO and ULTIMATE ranges, with our flagship ultimate UCT blade 'guaranteed to cut all tiles' and super-thin turbo UCTT for the hardest of porcelains.

Merchandising Stands

Merchandising Stands

OXPOS – MULTI

Versatile display option for stocking a wide range of OX products with 4 sides and the ability to move easily.
Dimensions: W: 66CM x H: 178CM x D: 66CM

Also for storing products inside the stand

OXPOS – TOOL1

The perfect option for stocking a complete range of OX products. Complete with hooks and header.
Dimensions: 100CM x 220CM x 50CM

ME-DSMS04

Versatile display option for stocking a wide range of OX products with 4 sides and the ability to move easily.
Dimensions: W: 66CM x H: 178CM x D: 66CM

OXPOS – LOW/SINGLE/DOUBLEXT

Compact low gondola stand with double sided kit available for extra flexibility.
Dimensions: 103CM x 151CM x 52/98.5CM

Merchandising Stands

OX Stackable Box Display - 34cm Wide

OXPOS-STACKBOX

Dimensions:

W: 34CM x H: 41CM x D: 46CM

OX 1/4 Pallet Dump Bin with 5 Insert Trays

OX-DS450205

Dimensions:

W: 58.5CM x H: 100CM x D: 58.5CM

OX Diamond Counter Display - 4", 5" and 9"

OX-DS451703

Dimensions:

W: 50CM x H: 32CM x D: 14CM

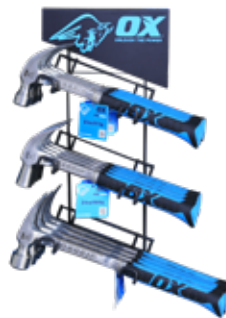

OX Level Display Stand

OXPOS-LEVEL1

Dimensions:

W: 36.5CM x H: 46CM x D: 26CM

measurements do not include any levels)

OX Hammer Rack - Suits 3 Hammers

ME-DSHR03

Dimensions:

W: 25CM x H: 53CM x D: 16CM

OX Universal Counter Display - 2 Hook

OX-D452402

Dimensions:

W: 30CM x H: 40CM x D: 15CM

LOSS OF TENSION

CAUSES

Using the wrong blade on a specific material. A blade specifically designed and manufactured for cutting tiles will wear out extremely fast if used on highly-abrasive material such as block.

Inadequate water is supplied to the blade.

Bad spindle bearings, worm mounting arbor, or misaligned shaft.

Loss of power, resulting from loose drive belts or improper voltage.

REMEDIES

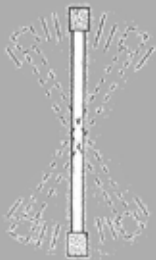

Avoid using general purpose specifications for cutting a single specific material. General purpose diamond blades are designed to cut a wide range of materials. Since it is unlikely an operator will be cutting an equal amount of both hard and soft materials at all times, this is not the most economical method of cutting.

Make sure water hoses are clean and free from any blockages. Approximately nine litres of water per minute are required to properly cool a masonry saw blade. On concrete saws, 9-22 litres per minute are required.

Replace defective parts.

See machine manual for proper belt tightening, replace worn belts, make sure proper line voltage is being supplied to the motor.

BLADE WOBBLER

Blade is too hard for material being cut.

Blade has become dull as a result of being used on too hard a material.

Blade does not cut material it was specified for.

Insufficient power, not allowing blade to cut properly. Often, the blade will stall in the cut.

Select the proper blade specification for the material being cut. Consult blade recommendation chart.

Dress or sharpen with mortar droppings or by cutting a lightweight abrasive building block to expose diamonds. If continual dressing is required, the blade specification is too hard for the material being cut.

First, make sure the blade is correct according to the blade recommendation chart. If the blade is correct, allow it to dress itself on the material to be cut. If it does not dress itself, sharpen it as you would a dull blade, according to the procedure described above.

Tighten belts in accordance with machine maintenance instructions. Use correct voltage at motor and adequate horsepower for cutting application.

SEGMENT LOSS

CAUSES

On masonry saws, the material is not held firmly, which causes the blade to twist or jam in the cut and loosen the segment.

Overheating is due to inadequate supply of water or complete loss of water. This is usually accompanied by discolourations which appear on the steel centre near the area of segment loss.

Steel centre is worn thin as a result of undercutting by abrasive fines generated during cutting. The steel centre (blank) wears to a knife edge, weakens and causes a segment to be separated.

Defective blade collars cause the blade to flutter in the cut or fail to adequately support the blade in perfect alignment.

Blade is too hard for material being cut, causing excessive dullness and segment separation due to impact or fatigue. This can also cause frictional heat that can melt the braze when insufficient water is supplied to the blade.

Blade is cutting out of round resulting in a pounding impact.

Improper blade tension causes high pressure on the segments and subsequent failure of the brazed joint.

REMEDIES

Hold the material firmly against the backstop.

Provide adequate water flow to both sides of the blade. Look for line blockages. On concrete saws, temporary complete loss of water can result from equipment running over the water feed hoses.

Use sufficient water to flush fines out of the cut. If generated fine s are highly abrasive, blades with undercut protection.

Clean foreign material from the blade clamping disc surfaces, ore replace clamping discs if they are under manufacturer's recommended diameter.

Use the proper blade specifications for the material being cut.

Replace worn bearing, realign blade shaft, or replace worn spindle.

Make sure the running speed of equipment is specified when ordering blades. On concrete saws, the spindle speed should be checked with a tachometer to ensure that each diameter blade is running at the recommended cutting speed and blade-tensioned speed.

DISTORTED CENTRE STEEL

Inadequate tightening of the blade on concrete saw mounting shaft. This causes drive pin to force its way through blade blank.

Dropping saw head with mounted blade particularly on concrete saws. Also dropping objects on unmounted blade distorts blade blanks.

Tighten clamping nut securely.

Avoid dropping the blade. Protect blade from abuse and handle with care.

UNEVEN SEGMENT

CAUSES

Insufficient water, generally to one side of the blade, reduces side clearance and does not flush out fines.

Equipment defects cause the segment to wear unevenly.

Saw head is misaligned.

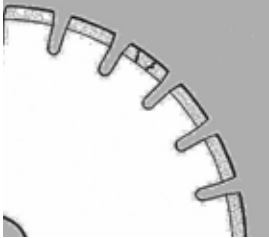

REMEDIES

Flush out the water system. Make certain that water is adequately and evenly distributed to both side of the blade.

Replace bad bearings, worn or misaligned spindle. On concrete saws, the engine must run smoothly to prevent harmonic vibrations which cause the blade to pound on a regular cycle basis.

Check saw head alignment for squareness both vertically and horizontally.

CRACKS IN SEGMENTS

The blade is too hard for the material being cut.

Use blade with a softer bond.

CRACKS IN STEEL CENTER

Blade flutters in a cut as a result

Blade specification is too hard for material being cut.

Forcing blade in operation.

Twisting blade in cut.

Tighten the blade clamping disc nut. Be sure that the blade is running at the properly tensioned speed and that the drive pin is functioning properly.

Use softer blade bond to eliminate stresses which create cracks.

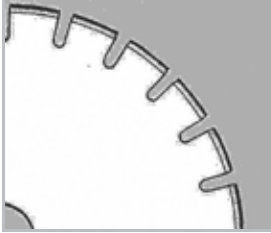

Allow blade to cut freely without bouncing.

Ensure blade is kept in straight line do not force around corners.

Diamond Blade Troubleshooting Guide

SHORT LIFE

CAUSES

Using the wrong blade on a specific material. A blade specifically designed and manufactured for cutting tiles will wear out extremely fast if used on highly-abrasive material such as block.

Inadequate water is supplied to the blade.

Bad spindle bearings, worm mounting arbor, or misaligned shaft.

Loss of power, resulting from loose drive belts or improper voltage.

REMEDIES

Avoid using general purpose specifications for cutting a single specific material. General purpose diamond blades are designed to cut a wide range of materials. Since it is unlikely an operator will be cutting an equal amount of both hard and soft materials at all times, this is not the most economical method of cutting.

Make sure water hoses are clean and free from any blockages. Approximately nine litres of water per minute are required to properly cool a masonry saw blade. On concrete saws, 9-22 litres per minute are required.

Replace defective parts.

See machine manual for proper belt tightening, replace worn belts, make sure proper line voltage is being supplied to the motor.

BLADE WILL NOT CUT

Blade is too hard for material being cut.

Blade has become dull as a result of being used on too hard a material.

Blade does not cut material it was specified for.

Insufficient power, not allowing blade to cut properly. Often, the blade will stall in the cut.

Select the proper blade specification for the material being cut. Consult blade recommendation chart.

Dress or sharpen with mortar droppings or by cutting a lightweight abrasive building block to expose diamonds. If continual dressing is required, the blade specification is too hard for the material being cut.

First, make sure the blade is correct according to the blade recommendation chart. If the blade is correct, allow it to dress itself on the material to be cut. If it does not dress itself, sharpen it as you would a dull blade, according to the procedure described above.

Tighten belts in accordance with machine maintenance instructions. Use correct voltage at motor and adequate horsepower for cutting application.

BLADE BORE OUT-OF-ROUND

CAUSES

Blade collar is not properly tightened, permitting blade to either rotate or vibrate on shaft.

Blade collars are worn or dirty not allowing proper blade clamping.

Blade is not properly mounted.

REMEDIES

Tighten the spindle nut with a spanner to make certain that the blade is adequately secured to prevent rotation on shaft.

Clean blade collars, making sure they are not worn. Tighten arbor nut properly.

Make certain the blade is mounted on the proper shaft diameter before tightening arbor nut. On concrete saws, make certain the pin hole slides over arbor drive pin. Never depend on the drive pin to actually drive the blade. A drive pin is simply a safety measure to prevent the blade from spinning on its spindle should the nut become loose.

UNDERCUTTING STEEL CENTRE

Abrading or wearing away of the steel centre faster than the diamond segment is due to highly abrasive fines generated during cutting.

Use as much water as possible to flush out fines generated during cutting or use blades with undercut protection. NOTE: Blades with undercut protection are not always the final answer to eliminating undercutting. There must still be taken to provide sufficient water to the steel centre are immediately adjacent to the segment. This is especially important when making deep cuts.

BLADE WORN OUT-OF-ROUND

Shaft bearings on masonry or concrete saws are worn, causing the blade to run eccentrically and wear out-of-round.

Engine is not properly tuned on concrete saws, causing surges in blade rotation.

Blade spindle hole is damaged from previous mismounting.

Blade mounting spindle is worn. A groove may have been scoured on the mounting spindle as a result of previous blades spinning on the arbor. When a new blade is placed on such a worn spindle, it seats improperly and runs eccentrically.

Blade slips on arbor shaft.

Bond is too hard for material causing machine to 'pound' at regular intervals, wearing one half of the blade more than the other half.

Install new blade shaft bearings or blade shaft, as required.

Tune engine according to saw manufacturer's manual.

For large diameter blades it may be possible to rebraze segments to a new centre.

Replace worn shaft or spindle bushing.

On a masonry saw, tighten the blade collar. On a concrete saw, make certain that the drive pin is functioning.

Use proper blade specification.

FAQ's

Can I place an order without an account?

How do I apply for an account?

How long will it take for my account to be opened? .

Do you provide your pricelist in an excel version?

Do you accept credit cards?

Do you have a minimum order value?

Do you offer same day dispatch?

Does OX sell to the public?

How long has the OX brand been around?

What are the pack quantities?

What category do you specialise in?

What is my sales representative's mobile number? ..

What is our minimum order value for FIS?

What is the freight charge under FIS?

What is your returns policy?

Answers

An account application must be completed and approved as an eligible distributor before placing orders.

Email the Customer Service Team at sales.au@oxtools.com for an account application form.

Once the application has been submitted, it will be reviewed within 5 business days.

Contact the Customer Service Team at sales.au@oxtools.com to receive a copy.

Mastercard, VISA and Amex are accepted.

\$50 is the minimum order value.

All orders placed by 12:00pm AEST will be dispatched the same day

OX only sells to authorised resellers, these distributors can be located on our website.

Our tool range was born in 1974 in Perth, Australia and was launched under the OX brand at the beginning of 2010.

All pack quantities are listed in this catalogue.

OX Tools has 46 years of experience in the wet trade tool market, diamond tool market and offers a range in multiple categories in the construction industry.

Call the Customer Service Team on 02 8845 6600 and they can provide your sales representative's mobile number.

\$500 Net

\$30.00 excluding access products. Contact our Customer Service Team for a price for freight costs on our access product range.

At OX, we have a sale or return policy. If you cannot sell an OX brand product within 3 months of purchase, simply return it in a suitable/saleable condition for a full refund.

Terms and Conditions

1. INTERPRETATION

- (a) 'Contract' means the standard trading terms and conditions of sale (which applies to each and every Quotation and/or Order) and includes any Quotation and Order.
- (b) 'OX Tools' means OX Tools AU Pty Ltd (ABN 41151919569).
- (c) 'Customer' means the entity to which 'OX Tools' enters into a Contract for the sale of Goods.
- (d) 'Goods' means the products described in the Quotation or Order and includes replacement products.
- (e) 'Order' means a written or verbal order from the Customer to OX Tools.
- (f) 'Quotation' means a written or verbal quotation provided by OX Tools to the Customer.

2. ORDERS

- (a) Orders for Goods will be binding upon OX Tools and the Customer. However, OX Tools reserves the right to accept orders in whole or in part.
- (b) Once OX Tools has accepted an Order, the customer may not alter or modify the Order without the prior written consent of OX Tools.
- (c) A 30% restocking fee applies to all returned goods providing they are in re-saleable condition.

3. PRICES

- (a) All prices contained in the Quotation and/or Order will be exclusive of GST. All prices are in Australian dollars and subject to alteration without notice. All invoices are in Australian dollars and must be settled in Australian dollars.
- (b) Any order placed with a value of under \$50.00 excluding GST will not be processed. This minimum invoice value does not apply to back-orders.
- (c) Orders with an invoice value of over \$350.00 excluding GST will be shipped free in-store.
- (d) Orders with an invoice value of under \$350.00 excluding GST will incur a freight charge of \$30.00 + GST (freight charges subject to change).

4. PAYMENT AND CREDIT TERMS

- (a) Unless otherwise agreed in writing, the payment due date is strictly thirty (30) days from the end of the month in which the Goods are sold to the Customer.
- (b) Accounts with overdue balances will automatically have credit withdrawn until all outstanding balances are cleared. OX Tools reserves the right to charge interest at the rate of 2% on all overdue balances calculated on a daily basis from the due date until such amount is paid.
- (c) If the Customer defaults in payment of any invoice when due, the Customer will indemnify OX Tools from and against all OX Tools' costs and disbursements including a solicitor and own client basis and in addition to OX Tools' nominee's costs of collection.

5. DELIVERY OF GOODS AND RISK

- (a) Delivery of the Goods shall be made to the Customer's address. The Customer shall make all arrangements necessary to take delivery of the Goods whenever they are tendered for delivery.
- (b) The failure of OX Tools to deliver will not entitle the Customer to treat this Contract as cancelled.
- (c) OX Tools will not be liable for any loss or damage whatever due to failure by OX Tools to deliver the Goods (or any part of them) promptly or at all.
- (d) All risk for the Goods passes to the Customer on delivery even if OX Tools retains ownership.
- (e) Delivery will be free in store (FIS) Australia wide for Orders in excess of \$350.00 excluding GST. However, the Customer will be liable delivery charges if a delivery date is required outside of usual delivery times. Orders less than \$350.00 excluding GST will be subject to the current freight charge of \$30.00 + GST (freight charges subject to change)

6. RETENTION OF TITLE

- (a) All Goods remain the property of OX Tools until the Customer has paid for the Goods in full. If payment is made by cheque, payment will not be deemed to have been made until the cheque has been honoured.
- (b) If the Goods are on-sold by the Customer before payment to OX Tools, the proceeds of sale will become property of OX Tools.

- (c) If the Goods are not paid for pursuant to clause 4, OX Tools may give notice in writing to the Customer to return the Goods or any part of them to OX Tools.
- (d) OX Tools may enter the Customer's premises without notice at any time and take possession of the Goods and without being responsible for any damage thereby caused if:
 - (i) The Customer does not pay for the Goods under clause 4;
 - (ii) The Customer fails to return the Goods upon demand;
 - (iii) A trustee in bankruptcy, administrator or receiver is appointed over the Customer;
 - (iv) Winding-up proceedings in relation to the Customer are commencing; or
 - (v) The Customer becomes bankrupt.

7. CLAIMS

- (a) The Customer will inspect the Goods on delivery and will within seven (7) days of delivery notify OX Tools in writing of any alleged defect, shortage in quantity, errors, omissions or failure to comply with the Order or Quotation.
- (b) The Customer will afford OX Tools the opportunity to inspect the Goods within a reasonable time of delivery if the Customer believed the Goods are defective in any way. If the Customer fails to comply with these provisions, the Goods will be deemed to be free from any defect or damage and payment will be owing under this Contract.
- (c) If OX Tools agrees in writing that the Customer is entitled to reject the Goods because they are defective:
 - (i) The Goods must have a corresponding invoice number quoted;
 - (ii) Freight charges incurred for the return of the Goods being returned is at the expense of the Customer, unless otherwise agreed; and
 - (iii) OX Tools' liability is limited to either replacing or repairing the Goods at its discretion.
- (d) OX Tools does not warrant that the Goods are fit for any particular purpose or an intended use by the Customer.

8. LIMITATION OF LIABILITY

- (a) Subject to clause 8(b), OX Tools will have no liability whatsoever for any direct or indirect losses, expenses, damages and costs incurred by the Customer caused by any breach by OX Tools of this Contract or any negligent act or omission.
- (b) The liability of OX Tools to the Customer in the event of any breach of this Contract or other cause of action will not exceed the prices of the Goods.

9. PRIVACY ACT 1998

- (a) The Customer agrees for OX Tools to obtain from a credit-reporting agency and the trade referees a credit report containing personal credit information about the Customer and any additional information required by OX Tools.
- (b) OX Tools may exchange information about the Customer with those trade referees name in the application form for a trading account or named in a consumer credit report issued by reporting agency to:
 - (i) Assess the Customer's application;
 - (ii) Notify other credit providers of a default by the Customer;
 - (iii) Exchange other information with other credit providers as to the status of the trading account, if the Customer is in default with other credit providers; and
 - (iv) Assess the credit worthiness of the Customer.

10. GENERAL

- (a) If any provision of these terms and conditions becomes void or unenforceable, it will be severed from this agreement without affecting the enforceability of the other provision, which will continue to have full force and effect.
- (b) These terms and conditions are governed by the laws of New South Wales and each party irrevocably and unconditionally submit to the nonexclusive jurisdiction of the courts of New South Wales.
- (c) OX Tools may terminate or vary this Contract or cancel delivery of Goods at any time before the Goods are delivered by giving written notice. OX Tools will not

be liable for any loss or damage whatever arising from termination or cancellations.

- (d) The Customer acknowledges and agrees that the goods sold to the Customer by OX Tools cannot be offered for sale through third party shopping websites or platforms (including but not limited to eBay and Gumtree) without the express written authorisation of OX Tools.

11. PERSONAL PROPERTY SECURITY ACT (PPSA)

11.1 The Customer agrees, at the request of OX Tools, to enter into a Security Agreement with OX Tools to grant in favour of OX Tools a Security Interest in all the Customer's present and after acquired property relating to the Goods.

11.2 The Customer acknowledges and agrees that it shall, within 14 days of request from OX Tools, do all things and sign all documents as required by OX Tools to register, confirm or validate the Security Interest created over the Customer's assets by any Security Agreement.

11.3 OX Tools may exercise its rights under the Security Agreement any time after the Customer fails to comply with this Agreement, without OX Tools first having to take any action or enforce any of its other rights against the Customer.

11.4 The Customer will be entitled to a release of the Security Agreement when all its obligations under this Agreement have been satisfied.

11.5 The Customer shall not without OX Tools' prior written consent, which will not be unreasonably withheld, do any of the following:

- (a) acquire any asset which is, or upon acquisition, will be subject to a Security Interest which is not a Permitted Security Interest; or (b) give any person other than OX Tools control or possession of the Goods (other than under a Permitted Security Interest).

11.6 The Customer agrees that it will promptly take such action as OX Tools may require (including providing information or signing documents) to ensure that any Security interest granted in favour of OX Tools attaches to the secured property and to enable OX Tools to perfect any such Security Interest or otherwise exercise any rights that it may have under the PPS Law in relation to the secured property.

11.7 The Customer acknowledges and agrees that, from the registration commencement time under the PPSA:

- (a) it shall not cause or permit any person to take a Security Interest over, or to register a financing statement in relation to, any secured property without the prior written consent of OX Tools and will immediately notify OX Tools if it becomes aware of any person taking steps to register a financing statement in relation to such secured property;
- (b) it has no rights under, or by reference to, sections 125, 142 and 143 of the PPSA if it defaults and OX Tools takes enforcement action under this Agreement in respect of the secured property;
- (c) it waives its rights to:
 - (i) receive any notice under sections 95, 130 and 135 of the PPSA in relation to the enforcement of any Security Interest over the secured property;
 - (ii) receive a statement of account under section 132(3)(d) and 132(4) of the PPSA if OX Tools disposes of any of the secured property following repossession of that secured property; and
 - (iii) receive a copy of, or notice of, any verification statement confirming registration of a financing statement or a financing change statement relating to any Security Interest under, or provided for by, this Agreement.

11.8 Except if section 275(7) of the PPSA applies, each party to this Agreement agrees not to disclose any information of the kind referred to in section 275(1) of the PPSA that is not publicly available.

Warranty

OX Tools AU Pty Ltd (OX Tools) warrants that all goods supplied by it and purchased by you from Authorised OX Tools Dealers throughout Australia are free of defects except for those goods listed under Warranty Exclusions.

Warranty Claims

If you consider that any goods supplied by OX Tools is defective, you can lodge a claim under this Warranty and any apparent fault will be rectified free of charge by OX Tools or an Authorised OX Tools Dealer within the Warranty Period, which is effective from the date of purchase provided that you meet the following conditions;

- You must produce the original invoice/receipt or other proof of purchase document disclosing the purchase date.
- All costs of installation, cartage, freight, travelling expenses, hiring tools and insurance are paid by the customer.
- The goods, being precision equipment, has not been misused, adjusted or serviced by any person other than an Authorised OX Tools Dealer.
- The equipment has been installed correctly and is used in accordance with the OX Tools instructions supplied with the goods.

OX Tools provides this warranty in addition to all other rights and remedies that you may have under law in relation to the goods to which this warranty relates.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage.

You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Notwithstanding the preceding clause, OX Tools' liability in respect of a breach of a consumer guarantee or any warranty made under these Conditions of Warranty for any goods not of a kind ordinarily acquired for personal, domestic or household use is limited, to the extent permissible by law and at the option of OX Tools to:

1. Replacing the goods or the supply of equivalent goods;
2. The repair of the goods;
3. The payment of the cost of replacing the goods or of acquiring equivalent goods; or
4. The payment of the cost of having the products repaired.

To the extent permitted by law, all other warranties whether implied or otherwise, not set out in these Conditions of Warranty are excluded and OX Tools is not liable in contract, tort (including, without limitation, negligence or breach of statutory duty) or otherwise to compensate the customer for:

1. Any increased cost or expenses;
2. Any loss of profit, revenue, business, contracts or anticipated savings;
3. Any loss or expense resulting from a claim by a third party; or
4. Any special, indirect or consequential loss or damage of any nature whatsoever.

If you wish to make a claim under this Warranty, you should:

- Contact by Phone: +612 8845 6600;
- Visit your nearest Authorised OX Tools Dealer;
- Visit OX Tools website for details: www.oxtools.com

These conditions may only be varied with the written approval of the directors of OX Tools.

Warranty Period

Product Type	Warranty Period
Diamond Tools	12 Months
Hand Tools	12 Months
Access Equipment	12 Months
Safety Equipment	12 Months
Construction Machinery	12 Months

Warranty Exclusions

This section identifies what is excluded under this Warranty. This Warranty does not cover damage caused by:

- Misusing, overloading or abusing the OX goods,
- Operating the goods in a manner that is not in accordance with the OX Tools instructions supplied with the goods (the "Instruction Manual"),
- Failing to clean the goods in accordance with the instructions for correct and regular

cleaning as set out in the Instruction Manual,

- Not carrying out periodic maintenance,
- Neglecting or otherwise failing to maintain the goods in accordance with the instructions for maintenance of the goods including regular tune-ups, lubrication etc,
- Using incorrect voltage or non-authorized electrical connections with the goods,
- Installing the goods incorrectly,
- Using non authorised/non-standard parts, non-genuine OX Tools parts in connection with the goods,
- Repairing or carrying out any work on the goods by someone other than an Authorised OX Tools Dealer,
- Causing a double burnout - field and armature burnout,
- Operating the goods with any guard, shield or line cutting knife removed, repositioned, or that is incomplete or damaged,
- Using or operating the goods with any evidence of partial failure of goods or damage being present,
- Tampering with the goods in any way other than in accordance with the manual,
- Not having taken reasonable steps to prevent the damage or failure from occurring to the goods,
- Storing the goods inconsistently with manufacturer's recommendations or where the goods is exposed to corrosive substances such as fertilisers, grass and plant residue including palm tree sap, bore water and other detrimental environmental exposure,
- Making mechanical adjustments that are inconsistent with the Manual- including, chains, bars, engine tuning etc,
- Operating the goods with incorrect fuel to oil ratio,
- Having made improper adjustments of ignition timing or the carburettor,
- Using the goods with clogged or removed filters (i.e. fuel filter, oil filter, air filter),
- Using incorrect chain and bar oil/lubricant for the oil pump.

In addition to the above, this Warranty DOES NOT cover the following:

- Goods purchased:
 - Outside of Australia,
 - from a non-Authorised OX Tools Dealer (such as purchases from unauthorised retailers and purchases over the internet, from local/ international sellers or sites such as, but not limited to, Ebay and Gumtree),
 - at an auction, or
 - from a private seller.
- Accidental damage or damage caused by an extra ordinary event or circumstance beyond your or anyone else's control including damage caused by:
 - environmental factors,
 - natural discolouration of material due to ultraviolet light,
 - crushing, impact with hard surface or damage caused in the transit of the goods, foreign material, or exposure of the goods to excessive heat or cold or to solvents, or water entry into the goods,
 - abnormal goods performance caused by any ancillary equipment interference or other external factors,
- Damage or failure that occurs for a reason or reasons that were already disclosed to you (in writing or otherwise), prior to your purchase of the goods,
- Damage or defects to the goods that ought reasonably to have been revealed to you by an examination of the goods, where you conducted such an examination before acquiring the goods,
- Normal wear and tear due to the course of normal use,
- Freight costs associated transporting the goods between you, the place of purchase, the Authorised OX Tools Dealer and OX Tools for the purposes of making a claim pursuant to this Warranty or otherwise,
- Repairs that are required by you to be made to the goods which are simply due to a clogged or restricted exhaust system, carbon deposits in exhaust ports, piston crown or combustion chamber or periodic decarbonising,
- Goods with serial number altered or removed,
- Refurbished, ex display or factory second goods,
- Consumable items supplied with the goods or that are a part of the goods,
- Service parts,
- Accessories, that for the avoidance of doubt include but are not limited to the following: those included with the goods at the time the goods was purchased by you including cases & site bags, brushes, chucks, cord sets, bulbs, LED's & lamps, driver & drill bits, blades, driver blades, o-rings, switches & triggers, power tool attachments, blades and cutters, spark plugs, carburettor kits, filters, bars & chains, cutting equipment, recoil springs, rope, belts, measuring devices, air (pneumatic) fittings, nose caps, gaskets, fuel hoses,
- The goods coming into contact with sand, water, rust, corrosion, fire, vermin and insect infestation, power outages or surges or inadequate voltage or current.

If the goods you are using has been rented or leased by you, and you consider a claim might be made under this Warranty, you should refer the matter to the rental or leasing company immediately and they will handle the matter.

This Warranty does not cover service costs in replacing and maintaining consumable parts and accessories that have ceased working through normal wear and tear such as, but not limited to: drill heads, blades, cutters and other parts classifiable as a consumable part or accessory.

A series of horizontal dotted lines for writing notes, filling the majority of the page.

Notes

A series of horizontal dotted lines for writing notes, spanning the width of the page.

Safety

Safety is not something that is taken lightly at OX. When we design and build our tools the safety of the operator and safety of the tool is always the most important factor that is well thought-out during the whole process.

Safety when using OX tools is of paramount importance. Ultimately safety comes down to the operator which is why instructions need to be read and adhered to. It is also important to ensure the correct safety clothing is worn whilst working on a construction site.

Environmental

OX Tools is committed to managing environmental impact as an integral part of our operations. In particular, it is our policy to assure the environmental integrity of our processes and facilities at all times. We will do so by adhering to the following principles:

We employ management systems and procedures specifically designed to minimise the use of hazardous materials, energy and other natural resources, to minimise the generation of waste and to enable recycling and reuse of materials.

We continually seek opportunities to improve our environmental performance by establishing objectives and targets, measuring progress, and reporting our results; including but not limited to energy, water, paper and fuel consumption and vehicle miles travelled.

We promote participation and communicate our commitment to responsible environmental management by promoting environmental responsibility among our employees; by providing the necessary training and support to enable them to implement this policy; by informing suppliers of our environmental policy and encouraging them to adopt effective environmental management practices; and by soliciting input from our employees, suppliers, customers and board members in meeting our environmental goals.
